

High Rise Unit

Up, Up & Away!

When a high-rise construction project finally gets off the ground, so do your workers, literally! National Construction Rentals has the ability to complement any multilevel construction site with lift packages on all of our portable toilets: Regular, Deluxe and Deluxe Plus.

Each lift package is manufactured with **secure, reinforced steel cabling**, allowing positioning a breeze with the help of a forklift or crane. High Rise Units are a perfect solution for nearly any construction application where needs might require placing a portable toilet in a hard-to-reach location, whether it be on a commercial high-rise, a multi-level renovation, or public works project.
